My Parents

To start off, all that I have to say is that my parents are the best! I don't know one thing that they never did for me. They bring me to my soccer games and practices, they buy me clothes, they make me food and they do about every thing else, too. This is why I think my parents are the best.

First, I will tell you how amazing my dad is. He is the one who brought me here now. If I didn't have my dad, I would be living miserably. He is the one who pays all the bills and who bought us a house. I am very, very proud of my dad for all his work and effort.

He is also very caring. He does whatever he has to do to keep our family a family forever. He also helps me with my homework when I need it. I always understand it when he helps me. He pays all the money for me to play soccer. He especially always makes me laugh along with my brother, sister, and of course, my mom.

My mom is the best. Wherever I think of my mom, I think of the best mom ever, the best cook ever, and also the most caring mom in the world. She knows every recipe in the book. I always think that I should buy her a cookbook, but she has her own cookbook in her head! She always cooks for me, looks after me, and always cares for me. This is why my mom is the best mom in the world.

In conclusion, my parents are the best there can be. My mom is always caring and she is the best cook ever. My dad works really, really, really hard to keep us where we are and he is always funny. Finally, I hope I've convinced you that my parents deserve to be the parents of the year.
